We bring the capital > You do the trading
We share the profits

The5ers is a unique trader funding & growth program. The program is designed by experienced traders for traders from any knowledge background and trading discipline looking to establish a solid and lucrative independent trading career.

The5ers is a worldwide trading talent recruiting program, aimed at finding qualified traders to trade online for a private trading fund.

Anyone Can Join

The program is open to any trader and is conducted on a real money trading account, fully funded by The5ers' capital.

Double Your Account Every 10%

The5ers offers the fastest growth program in the industry. Qualified portfolio managers are given short and achievable profit milestones, as low as 10% (varies by selected program). When a milestone is reached, The5ers doubles your account along with all the trading objectives, giving you twice the earning potential.

Trade Real Money, From Day One

With The5ers, your skill and time are appreciated from day one. The entire program is conducted with real money trading accounts, meaning you get the net profits even during the qualification period!

Reachable Qualification Objectives

The5ers Evaluation period lasts between 20 trading days and 6 months. During this period, the trader is expected to showcase their trading style by reaching 6% profits (may vary by program). The program requires adopting simple risk management objectives - such as avoiding relative drawdown, stop loss placement, and proper position sizing and is quite easy to integrate with most trading disciplines.

Join the most lucrative trader funding & growth program
