

## KraneShares SSE STAR Market 50 Index ETF

### Investment Strategy:

KSTR seeks to track the performance of the Shanghai Stock Exchange (SSE) Science and Technology Innovation Board 50 Index. The Index is comprised of the 50 largest companies listed on the SSE Science and Technology Innovation Board (STAR Market) as determined by market capitalization and liquidity.

### STAR Market Highlights:

- Facilitates the fast-tracking of private science and technology companies to an initial public offering (IPO).
- Since its establishment in July 2019, the STAR Market has become one of the largest IPO markets globally<sup>1</sup> and a premier listing venue for prominent Chinese unicorns (privately held startup companies valued at over \$1 billion).
- Recent increases in fund-raising activity on Chinese exchanges can largely be attributed to the STAR Market, which accounted for 47% of capital raised across China's Mainland A-Share market in 2020<sup>2</sup>.
- Potential inclusion in the SSE Composite Index and Shanghai-Hong Kong Stock Connect could result in greater flows for STAR Market securities.

### KSTR Features:

- Exposure to companies poised to be China's future leaders across industries that could represent the growth engine of China for decades to come.
- Innovation-driven science and technology companies in China that offer a potential source of uncorrelated, long-term growth.
- Includes companies from industries such as new-generation information technology, biomedicine, new energy, and environmental protection.

**Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Funds' full and summary prospectus, which may be obtained by visiting [www.kraneshares.com](http://www.kraneshares.com). Read the prospectus carefully before investing.**

**Risk Disclosures:**

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume.

Narrowly focused investments typically exhibit higher volatility. The Fund's assets are expected to be concentrated in an industry or group of industries to the extent that the Underlying Index concentrates in a particular industry or group of industries. The securities of companies in an industry or group of industries could react similarly to market developments. Thus, the Fund is subject to loss due to adverse occurrences that affect one industry or group of industries or sector.

The ability of the KraneShares SSE STAR Market 50 Index ETF to achieve its investment objective is dependent on the continuous availability of A Shares and the ability to obtain, if necessary, additional A Shares quota. If the Fund is unable to obtain sufficient exposure due to the limited availability of A Share quota, the Fund could seek exposure to the component securities of the Underlying Index by investing in other types of securities. The Fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses. The Fund is non-diversified.

The Fund may invest in Initial Public Offerings (IPOs). Securities issued in IPOs have no trading history, and information about the companies may be available for very limited periods. In addition, the prices of securities sold in IPOs may be highly volatile. In addition, as the Fund increases in size, the impact of IPOs on the Fund's performance will generally decrease.

High short-term performance of the fund is unusual and investors should not expect such performance to be repeated.

Fund shares are bought and sold on an exchange at market price (not NAV) and are not individually redeemed from the Fund. However, shares may be redeemed at NAV directly by certain authorized broker-dealers (Authorized Participants) in very large creation/redemption units. The returns shown do not represent the returns you would receive if you traded shares at other times. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns. Market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates the current NAV per share. NAVs are calculated using prices as of 4:00 PM Eastern Time.
